

# EUSRR Compliance Assessment

For ship recycling facilities residing outside of the European Union, in order to be able to accept ships flying the EU membership flag, the facility must be EU Ship Recycling Regulation (EUSRR) Compliant. Our hazardous materials Consultants conduct gap analysis and provide advice, recommendations and action plans to help our clients achieve compliance with EUSRR regulations.

## European Commission: Ship Recycling

### What is EUSRR Compliance?

Developed with input from the International Maritime Organisation (IMO) and its members, the 2009 Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships was created.

The impact of poor ship recycling decisions has been heavily documented over recent years. To combat this negative impact on individuals and the environment, the European Union adopted the Hong Kong Convention 2009 early (in 2013) under the EU Ship Recycling Regulation (EUSRR). This means that for ship recycling facilities that fall outside of the European Union, certain standards for The Safe and Environmentally Sound Recycling of Ships must be met in order to achieve compliance with regulation (Regulation EU 1257/2013).

Once the criteria are achieved, facilities can be considered for inclusion on the 'European List', allowing them to receive vessels for recycling that carry the flag of European Member States.

### How can Lucion help me to achieve compliance with EUSRR?

Working from locations from strategic bases across the globe, our Consultants have extensive knowledge of the regulation and of the requirements for compliance to be achieved. We can assist you by offering expert advice and guidance prior to your EUSRR application to the commission for review and consideration for inclusion on the 'European List'.

As part of the European Union Ship Recycling Regulation (EUSRR) Assessment, our consultants provide:

- On-site Inspections and Audits
- Compliance Assessment
- Gap Analysis
- Control Measure Recommendations
- Pre-application Review

### Why should I use Lucion to conduct my EUSRR Compliance Assessment?

Our internationally trusted Hazardous Materials and Compliance Consultants assist you in preparing your facility for your application and EUSRR audit. Ensuring your facility is fully compliant with EUSRR regulations prior to your audit can save you time, money, and demonstrates your organisation and facility as proactively combatting the effect of poor recycling decisions.

We can also assist you in carrying out inspection and testing works for the identification of hazardous materials and managing any remediation works at your recycling facility, as well as conduct Ship Recycling Facilities Plans (SRFP) required as part of our wider compliance and hazardous material management services.
